

Gobblet!TM JUNIOR

Rules of the Game

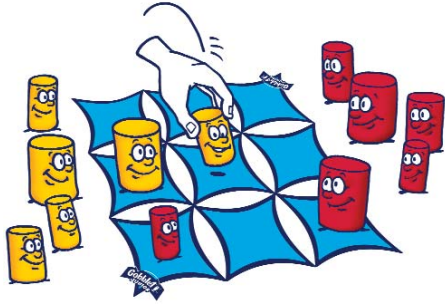

Equipment: A 9-square playing board and 12 playing pieces called Gobblets (6 red and 6 yellow) and plenty of fun.

Object of the Game

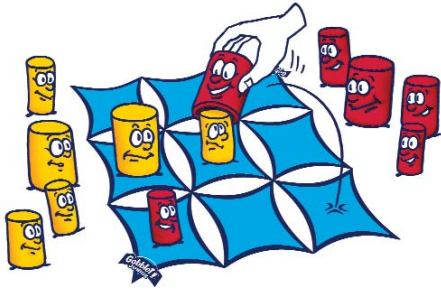

Like Tic-Tac-Toe, you must be the first player to get 3 pieces in a row to win.

Playing

Each player chooses a color. Then, in turn, you can either:

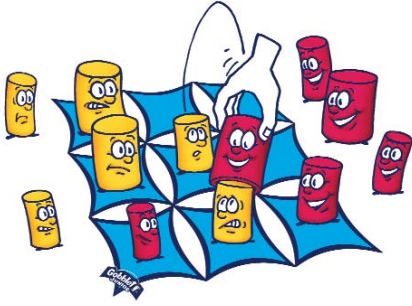

- 1** Put a new Gobblet on the board, on an empty space or over a smaller Gobblet.

- 2** Move one of your Gobblets already on the board to an empty space or over a smaller Gobblet. Once you touch a Gobblet on the board, you must move it. When you move a Gobblet on the board, make sure to lift it so that you only move one Gobblet at a time.

Winning

If you are the first player to align 3 pieces in a row, you win!

Tips on Strategy

- You don't have to start with your bigger pieces.
- Do not hesitate to gobble up your opponent's pieces.
 - You can gobble up your own pieces.
- The first player to align 3 pieces in a row wins, so when you wish to move a piece try to remember what is under it.
- Always look at what your opponent is doing, think ahead and have fun.
